

It's time for equal access to oral care for people with disabilities

More than two-thirds of the 6.5 million people with intellectual and developmental disabilities in the United States cannot access the dental care they need.

All Smiles Shine aims to change that. Join the movement at www.PAOH.org to access oral health educational materials, training for oral care professionals and more.

## Better dental visits for kids with autism? There's an app for that!

The All Smiles Shine app, developed by InfiniTeach, helps the autism and intellectual and development disabilities communities prepare for oral health success. App features include:

- Videos demonstrating preventive care and how to prepare for the dentist.
- Flossing and brushing tracker.
- Personalized sensory preferences and calming tools to share with the dentist.
- Picture schedules, breathing exercises, emotion identifiers and more.
- Caregiver tips and tricks.
